Global Market

The global crowdfunding market size was valued at usd 1.25 billion in 2022 and is projected to grow from usd 1.41 billion in 2023 to usd 3.62 billion by 2030, exhibiting a cagr of 14.5% during the forecast period. In this scope, we have considered crowdfunding software provided by companies such as go fund me, kickstarter, indiegogo, inc., Double the donation, fundable, and others. Crowdfunding is a method to raise funds for a particular project or cause by asking many individuals and businesses to contribute money, generally in small amounts, for a relatively short period.

It Is Done Online Via Social Networks, Which Makes It Easy For Groups To Share A Project Or Cause Within Their Social Platforms. Furthermore, It Usually Entails A Private Company Asking A Large Number Of People For all Contributions. Using Social Profiles, Social Networks, And The Viral Nature Of Web based Communication, Companies And Individuals Have Raised Billions Of Dollars In Equity, Debt, And Donations For Projects Over The Past Five Years. For Instance, Kickstarter Has Directed Over Usd 815 Million From 4.9 Million Backers To Nearly 50,000 Projects Worldwide Since 2009.

Algorithmic & Blockchain Solutions for Crypto-Trading

Crypto algorithmic trading involves using computer programs and systems to trade cryptocurrencies based on predefined strategies in an automated manner. These algorithms operate 24/7, executing trades at high speeds and without emotional influence.

What is **Forex** ?

Forex is one of the most enormous and liquid markets around the globe. In 2010, the forex market accounted for more than 3 trillion dollars of daily trading. Over the last decade, a 40% increase in the daily volume of forex trade with 6.6 trillion Dollars each day is seen. This marks a nine-year peak since 2010. But the surprising fact is that the market did not exist a century ago. Unlike the stock market, we cannot trace the roots of the forex market.

How Does Forex Trading Work?

Trading is a good option for investors

Forex trading works like any other transaction where you are buying one asset using a currency. In the case of forex, the market price tells a trader how much of one currency is required to purchase another. For example, the current market price of the GBP/USD currency pair shows how many US dollars it would take to buy one pound.

What is METAVERSE?

A **virtual-reality space** in which users can interact with a computer-generated environment and other users. It can be Avatars Meeting, Real Estate Property Trading etc.

What is NFT?

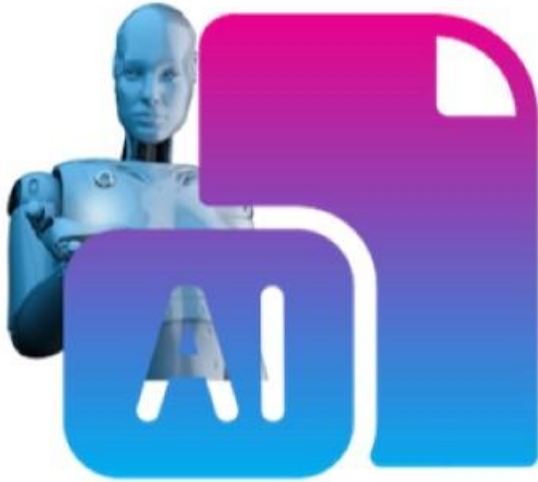

An NFT is a **non-fungible token**, an intangible digital asset in the form of images, video, or gaming items. NFTs are the main influencers for the growth of METAVERSE

Why We Call Them a Web 3.0?

Web3 or Web 3.0, the third generation of the Internet, is a **decentralized version of the Internet**. It's considered the next tech revolution as it combines Artificial Intelligence, Machine Learning with Big Data and is predicted to offer a personalized and private experience.

Why Open-Source AI important?

FX Banyan is an organization that will work on the **Community Choice and Governance**. The ecosystem is totally run and governed by the community and via Mining, it will be an open-source, peer-to-peer development skilled ecosystem from learners to the experts.

What are the key advantages of Open-Source peer-to-peer tools / software?

Open-source software have several key advantages:

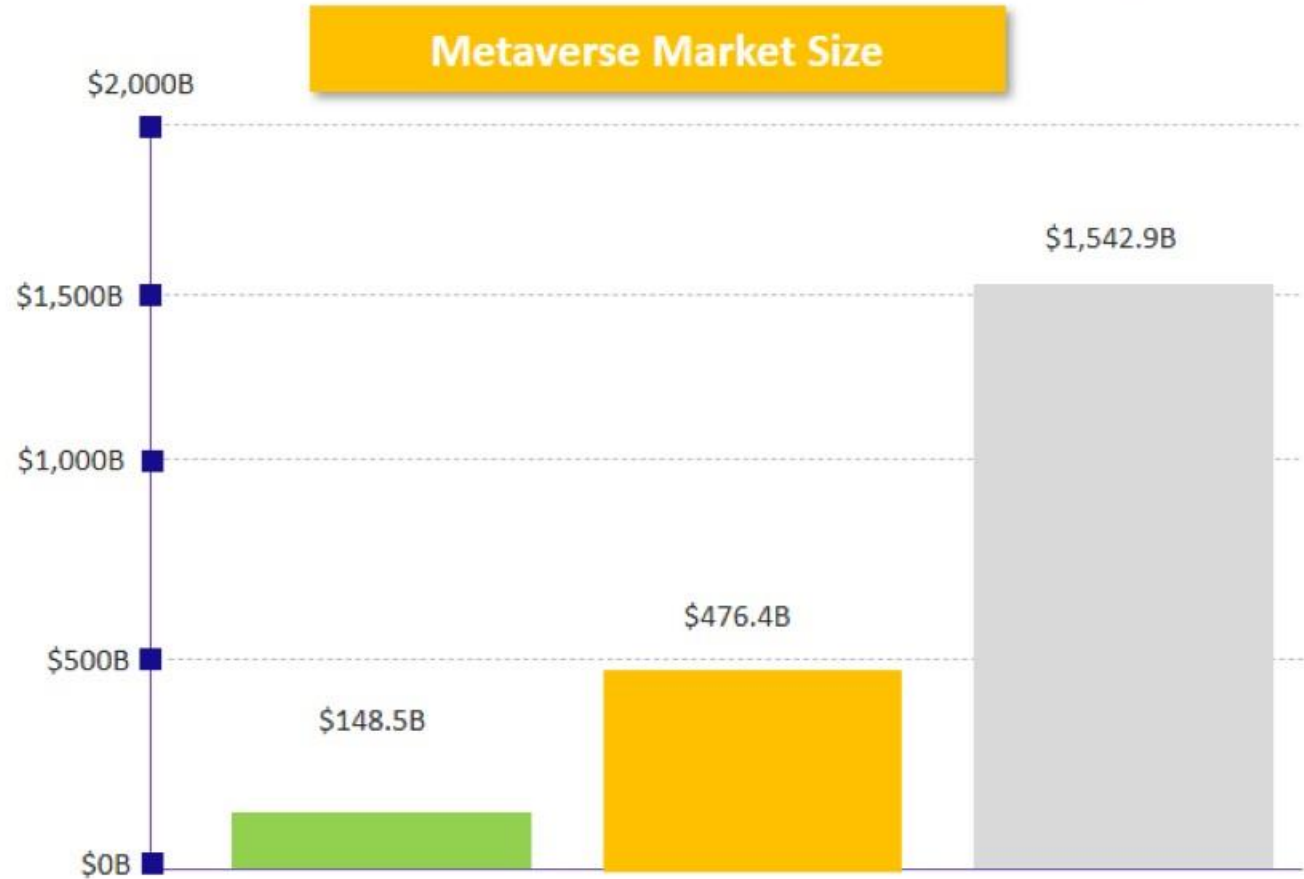

- More eyes = **Faster Bug Fixes**.
- Answers to Common Problems.
- Broader Adoption = **Easier Hiring**.
- Specialized **Support**.
- Maintenance and Version Control.
- Standardized Modules and Functionality.
- Our Recommendation.

DEVELOP, PLAY AND EARN

.....METAVERSE BY Fx banyan

As per top World Accounting & Audit Firm (FX Banyan) sources, the Metaverse market will be worth 1.542 Trillion USD in the next few years.

Problems

UNPREDICTABLE

Digital Markets, Art, and Metaverse are pretty much known for being exceptionally **UNPREDICTABLE**, with ecosystem & prices varying dramatically, even in the space of minutes.

RESOURCE CONSUMPTION

Users do also miss the opportunity by not taking part in any **NFT, Gamification** and **Metaverse** development due to the oblivious of the ecosystem **or** have less resources to be consumed **or** with NO Programming / Development skills.

TIME LIMITATION

Users in many cases, cannot put decent effort and time for the development of any system / art / object due to the **time limitations of daily life**.

Advantages of **NFT**

NFT tokens have gotten increased popularity over the past years, as they have continuously outperformed Bitcoin in the price charts. In fact, compound's COMP token rose 233% in its first week of trading, and Aave's LEND token has surged 1,000% in the last three months.

Advantages of NFT

Here are some of the top advantages of non-fungible tokens, which provide the foundation for their value.

Ownership	95%
Authenticity	85%
Transferability	45%
Creation of Economic Opportunity	99%
Boost Inclusive Growth	70%

But what drives such buzz around this topic?

For the crypto world, NFT is a revolutionary attempt to bring transparency, security, and decentralization to a traditional financial system that has outperformed its usage. In this sense, the advantages that NFT tokens bring to the table are many.
